## ART PARIS - BOOTH 15

**Cui Xiuwen** figures among the most famous female Chinese artists, always invited in major institutions on Chinese contemporary art exhibitions. Her main questioning is the female condition in China. She was recently exhibited at the Venise Biennale, Arsenale Nord. Her works figure in major public collections, such as Centre Pompidou in France or National museums in China, Israel, USA, Spain or Switzerland.

Recent French publications : L'Insense special China(2013) Art Press (2012).

With a Muslim and a Christian parent, **Mehdi-Georges Lahlou** experienced our multicultural society in daily life. Working on aesthetics, he disturbs clichés and breaks through barriers of religion and culture to question identity. He applied his ambiguous collages in photography as well as in sculpture or video.

Recent exhibitions in Palazzo Bembo, Venise Biennale, IMA in Paris, Gand cathedral or Boghosssian Foundation in Brussels)

Resulting from several juxtapositions of images, **Catalin Petrisor** paints pictures of a strange world : post-utopian landscapes and desolated interiors, ruins of unfinished constructions, hybrid spaces. These are all completed by imperceptible drawings that are meant to upset the primary meanings.

Collections : National Gallery in Prague, Nederlandsche Bank, museum in Taiwan)
